

National Wildlife Refuge Henslow's Sparrow Status Assessment Survey

(December 2006)

Have you seen this bird?

Name of Refuge: St. Vincent NWR **FWS Region:** Region 4 **State:** FL

Does the Henslow's Sparrow occur on or near the refuge? ☐ Yes ☒ No

If yes, do they use the refuge for (check all that apply): ☐ Breeding ☐ Wintering ☐ Migration

Do they occur on a particular unit(s) or throughout the refuge?

If on a particular unit(s), please list unit(s):

If breeding, what is its current status on the refuge?

How has breeding been confirmed on the refuge?

If breeding, please estimate the number of pairs on or near the refuge:

If they occur, please briefly describe the habitat in which the species occurs:

Add any further notes that may be relevant to this status assessment including other areas near the refuge that have Henslow's Sparrows: This refuge is a barrier island and gets very little use by birders so they may occur in small numbers, but have been undetected in some of the larger fresh water wetland sloughs. They winter on the mainland nearby.
